

Ashley Fine

I am excited to be part of the 3/4 intermediate teaching team at Skyview School this year. I bring with me approximately 17 years of teaching experience, including environmental education, dance/yoga instruction, tutoring and classroom teaching. This year will be my fifth year teaching at the third and/or fourth grade level.

During my career, I have also helped develop water/environmental education programs at Sharlot Hall Museum, The Spot Children's Museum, and the Heritage Park Zoo. I graduated with honors from Mills College in Oakland, California with a bachelor's degree in biology. I have an Arizona teaching certificate, a master's degree in elementary education, and a reading specialist endorsement through Northern Arizona University.

My husband Cisco and I have lived in the Prescott area most of our lives where we are currently raising our children Noble and Sedona. We are all looking forward to being a part of the Skyview Community this year.

I absolutely love teaching, learning and sharing my wonderment of the world with children. I strive to craft a classroom atmosphere in which my students feel valued, supported and appropriately challenged, so they can become independent, life-long learners with the foundational skills that will allow them to lead productive, meaningful lives. #
